CHECKLIST

Mastered for vinyl ☐ YES ☐ NO
Copyright Licence ☐ YES ☐ NO
Gaps between tracks in seconds: _____

DO YOU WANT A REFERENCE CUT BEFORE MAKING LACQUERS AND STAMPERS?

☐ YES ☐ NO

Reference cuts (per side)
Up to 16:00min - 700DKK / 95 EUR
Up to 20:00min - 790DKK / 110EUR
Up to 25:00min - 885DKK / 120EUR
+ SHIPPING

If you are not quite sure about the mixing and mastering quality, we recommend ordering one copy reference cut on acetate. During this process a number of adjustments and improvements can take place before the high cost lacquer cutting / stamper production and test pressings have been ordered. Reference cut is an excellent and inexpensive way to learn about how your program material will translate to the vinyl format.

NOTES FOR THE CUTTING ENGINEER

Maximum recommended playback time per record side is 25 minutes. For high fidelity sound keep the record sides up to 20 minutes. Extensively long playback may result in low volumes and poor quality.
